651-447-9428 | jrome8602@gmail.com | Woodbury, MN

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Aerospace Engineering; Cumulative GPA: 4.00/4.00

Aug. 2024 – Dec 2027

University of Minnesota

Minneapolis, MN

Dual Enrollment; Cumulative GPA: 4.00/4.00

Sept. 2023 – May. 2024

EXPERIENCE

UpperStory

Summer 2024 & Summer. 2025

Research and Development Intern

St. Paul, MN

- Integrated a new bumper system into a remote by prototyping/updating the mechanics, schematic, PCB, and code.
- Developed a vacuum tray to store game parts in the most efficient way minimizing material use and total volume.
- Designed a new battery solution with a custom PCB while collaborating on changes to the car's frame.
- Engineered a 4WD drivetrain, improving the car's driving ability by prototyping and iterating with resin printing.

NASA L'SPACE NPWEE

Jan. 2025 – May. 2025

Project Manager and Primary Reviewer

Atlanta, GA

- Led a team in developing a proposal on spacecraft debris protection, managing project risk, budget, and timeline.
- Learned to properly write and select an idea for a NASA proposal from NASA scientists, engineers, and managers.
- Chaired a proposal review session, grading another team's proposal on the same criteria as official NASA proposals.

EXTRACURRICULAR ACTIVITIES

FIRST Tech Challenge Robotics

Sept. 2019 – Feb. 2024

Team Captain

Woodbury, MN

- Led the team to appear in 3 consecutive state championship tournaments, winning awards in each appearance.
- Directed the design and manufacturing sub-teams introducing new systems and methods to bring 160 3D printed parts and up-cycling aluminum cans to mold into new parts for our robot.
- Nominated to personally attend the world championship tournament to represent the state of Minnesota.

Cystic Fibrosis Foundation

Jun. 2022 – Jun. 2024

Volunteer

St. Paul, MN

- Met with MN Senators and Representatives in Washington D.C. to discuss policy that helps the CF community.
- Volunteered annually to make the foundation's Breath of Life Gala and the Great Strides Fundraiser possible.

Yellow Jacket Space Program

Jan. 2025 – Current

Darcy Rocket Structures Team

Atlanta, GA

- Engineered and designed a mold for the Darcy nose cone, which was optimized for manufacturing constraints.
- 3D printed the molds with ABS and used an acetone wipe to create a smooth finish for the layup process.

DESIGN PROJECTS

3D Printed Clock

Jun. 2023 – Aug. 2023

- Designed and assembled a completely 3D printed clock with torsional energy system and escapement assembly

Tensile Test Machine

Dec. 2023 – Feb. 2024

- Used a load cell and Arduino to measure stress and strain to gather data on different material properties

Rubik's Cube Solver

Apr. 2025 – Jul. 2025

- Utilized a color sensor to identify an algorithmic solution and stepper motors to solve the cube

SKILLS & INTERESTS

Skills: Fusion, Inventor, NX, Solidworks, Matlab, 3D Printing, JavaScript, HTML, PCB Design

Interests: Hockey, Manufacturing, Skiing, CAD, 3D Printing
